

Below shows the code for the factorialPost.php script.

```
<html>
Factorial calculation<BR><BR>

<?php

    function factorial($arg){
        if($arg==0)
            return (1);
        else return (factorial($arg-1)*$arg);
    }

    $count=$_POST['inputValue'];

    print("The factorial of ". $count. " is "
        . factorial($count));

?>
</html>
```
